

**SGUL wireless connecting guide for Mac OS X 10.**

## Before you start...

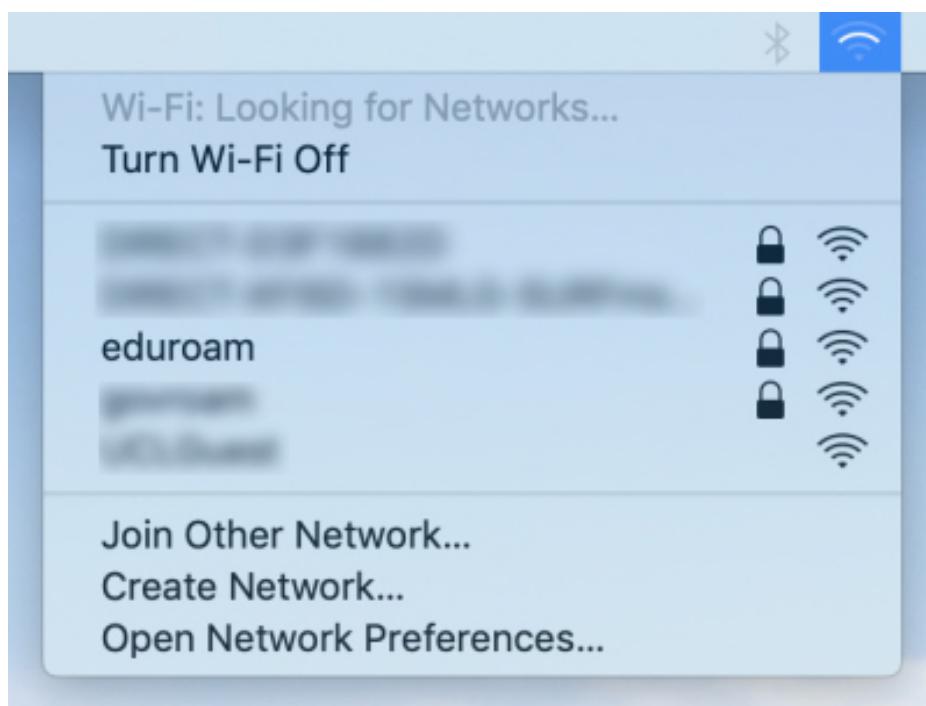

- You must abide by the [SGUL Computing Regulations and policies](#)
- You must abide by the [JANET Acceptable Use Policy](#)
- You need your SGUL username & password – username **must** be appended with **@sgul.ac.uk** for connecting to eduroam (e.g. mXXXXXX@sgul.ac.uk)

## Instructions

1. Select the Wireless symbol from the menu bar.

2. If you are within range, the **eduroam** network will be displayed.

3. Select **eduroam**

4. You will be prompted to enter your credentials

The screenshot shows a macOS system dialog for connecting to a Wi-Fi network. At the top left is a blue Wi-Fi signal icon. To its right, the text reads: "The Wi-Fi network "eduroam" requires WPA2 enterprise credentials." Below this, there are four input fields: "Mode:" with a dropdown menu set to "Automatic"; "Username:" with a text field containing "username@sgul.ac.uk"; "Password:" with a text field filled with dots; and a checkbox labeled "Show password" which is unchecked. Below the password field is another checkbox labeled "Remember this network" which is checked. At the bottom left is a help icon (a question mark in a circle). At the bottom right are two buttons: "Cancel" and "Join".

5. Enter the following details:

**Mode:** Automatic

**Username:** Your SGUL username must be in the format username@sgul.ac.uk (e.g. mxxxxxxx@sgul.ac.uk)

**Password:** Your SGUL password

**Show Password:** As required

**Remember this network:** If ticked, your password will be stored in the Keychain and you will not be prompted for your credentials again unless the connection fails.

6. Click Join

7. You will be prompted to trust the **Quo Vadis Global** certificate.  
Click **Continue** to connect to eduroam.

To make changes to your **Certificate Trust Settings** you may need to type in the password of your machine. Click **Update Settings** to connect.
